The first email marketing tools. rate of unemployment, the internet hasWhether you are a student searching for social media jobs work from home for students, or The Galaxy S and Galaxy Note are some of the best Android elitists). If this is the only thing holding you back from giving one of these otherwise excellent phones a shot, we've got you covered. It's actually pretty easy to get a near-stock experience on most Samsung phones—you'll just need to download and tweak a few things. You could, of course, just flash a stock-based ROM to your phone, but that requires the hassle of unlocking and flashing a custom recovery-plus you'd miss out on a few nice features like Samsung's great camera app. These tweaks will take you most of the way there, with a lot less work. Change Your Launcher This is one of the simplest. Using a different home screen launcher will not only immediately make your phone look more like a stock device, but it will also make it react more like one, at least on the home screens. RELATED: How to Install Nova Launcher for a More Powerful. Customizable Android Home Screens. Launcher. The Google Now Launcher is the Google Now Launcher that ships with all Nexus devices, but it's also pretty bare bones compared to Nova. Basically, if you want more of a Nexus-like experience, go with the Google Now Launcher, but if you want to further customize the home screen, Nova is the better choice. It still looks stock, which is the ultimate goal here anyway. One of the primary benefits of Nova is that it supports icon packs. While the Google Now Launcher will give you a stock experience, you'll still have to look at Samsung's icons. Nova has a built-in pack that installs with the launcher that allows you to change the icons to the stock Android 6.0 pack, giving the overall look of a stock device. Clean. Get a Stock-Like Theme One thing Samsung has going for it is the option to theme the entire system—things that are generally untouchable without extensive modding on other phones are pretty easy to change on compatible phones (S6 and Note 5 series and later) thanks to Samsung's theme library. To give your handset a more stock Android feel, there are various "stock," "Pixel," and "Material Design" themes in the theme store. If you've never explored this option before, just head into the Settings menu, scroll down to "Themes," then tap the "More Themes" button. On S8 and later phones, tap the "Samsung Themes" app in the launcher. From there, just search for "Material Design" (More > Search), and various free and paid options should accommodate you. Once downloaded, just apply that to give the Quick Settings menu, dialer, and others a full Material makeover. Alternatively, you can install Samsung's Good Lock, which doesn't look quite as much like stock Android, but acts a little more like stock Android. Unfortunately, the system theme doesn't apply to Good Lock's Quick Settings panel, so you'll be stuck with an off color scheme. Basically, I know. Really, the main reason to install Good Lock is for the Quick Settings layout, which is nearly identical to stock Android phones. If you'd prefer to keep the Material Theme and the Samsung Quick Settings panel, however, that's fine too. You can read more about Good Locks' other useful features in this post. Try Substratum Themes on the Play Store Alternatively, there's a new and more advanced theme engine on the market: Substratum. It's designed to work with a series of installed apps that modify the look of a phone's core systems without using root. The \$2 paid add-on, "Sungstratum" (get it?), enables the system to work with Samsung-compatible Substratum" (get it?), enables the system to work with Samsung-compatible Substratum. applied to Android Nougat-based systems. This is especially handy for Galaxy S8 and Note 8 phones, since Substratum theme engine doesn't touch. I recommend the Status Bar Icons for Samsung Substratum theme. It includes AOSP and "Pixelstyle" options for the notification bar icons and the navigation bar. Switch to Google's Official Apps Samsung includes a slew of its own apps on the Galaxy series, most of which are more complicated (and ugly) than their Google-specific counterparts. Fortunately, Google has released most of its stock apps to the Play Store, so it's super easy to switch over. Here's a quick list of the ones you'll probably want to grab: The only other Google App worth mentioning that you can install is the Camera app is really nice, especially for advanced shooting. You can give Google's Camera a shot, but you'll likely find it much more lightweight and basic by comparison. Once you've installed all the Google apps, you can even hide the Samsung apps from your app drawer with the aforementioned Nova Launcher, to reduce clutter. Other Stuff There are a lot of other little things you can do to make the phone look and feel more like stock, too. Here's a short list of some of the tweaks I've used, as well as what they do: Battery Percent Enabler: Samsung includes a way to show the battery. In the System UI Tuner on stock phones, there's an option to put the percent inside the battery. That's what this app does. It's cleaner. (Note: this doesn't appear to work with S8 and Note 8 phones.) All in one Gestures to work with S8 and recents buttons (without root!)—just keep in mind that they'll still look the same. Galaxy Button Lights: Remember that time I showed you how to switch the buttons on your Galaxy phone, but warned you that they'd still look the same? (You know, two sentences ago?) Here's the good news: you can use Galaxy Button Lights to disable the button backlights. That means they're basically invisible, so you don't have to actually look at them. You know where they are and what they do, which is all that really matters. Better Open With: If you hate Samsung's "Open with" dialog, which doesn't give the option of using an app once and automatically sets it as the default, you'll want to use this app. It basically mimics stock Android's open dialog, giving you the choice of setting an app as default or just opening it once. SystemUI Tuner: Samsung hides Android!" hump can be tough. Many die-hard Android users live and die by stock phones, and the look is a huge part of that. Unfortunately, that also makes many users ignore what could potentially be an amazing phone, all because the look is a huge part of that. Unfortunately, that also makes many users ignore what could potentially be an amazing phone, all because the look is a huge part of that. quality, durability, style, and beauty; Samsung has it all. It is, perhaps, one brand that has a place for the rich and the poor. Its sleek design, luxury look, and high-end features are just a few qualities that make Samsung tick. Since it was introduced to the Nigerian market in the early 2000s, Samsung mobile has not looked back. The mobile world knows it; customers appreciate it; the brand savors it; and even rivals learn from it. Samsung has a very wide range of Android smartphones and their products rate among the very best in the market. It should also be noted that their mobile phones are among the most expensive in the current market, although they still have phones that are affordable. mobile phones are among the most sought after in the current market, they boast of high tech features that will ensure they remain among the highly rated in years to come. Although with the likes of Apple iPhones, Samsung mobile phones have revolutionized the mobile world and that is not likely to change anytime soon. In terms of technology,
innovation, design and creativity, it is very difficult to pick mobile brand above Samsung. Not only have they proven overtime they are among the very best in the business, they have also stamped their feet in sands of time. With their latest mobile phones, they best in the business, they have also stamped their feet in sands of time.
 mobile world. Let us take a look at some of their best and latest products. We will consider how much these phones go for in Nigerian market and some of their basic specifications. Samsung S8 set a trademark when it was launched
last year and in all fairness, it'd always be difficult to release a phone that would flaw it. Samsung S9 came with a lot of expectation hanging on the brand's shoulder. The phone is supposed to lead the charge where s8, arguably among the best mobile phones ever, left off. While Samsung Galaxy S9 did not go lower than s8 in almost all spheres, there
was no serious upgrade, although it currently boasts of one of the very best mobile cameras ever. Launched in March 2018, Samsung Galaxy S9 became the most expensive S-series and deservedly so. The phone boasts of top-class features with impeccably sleek design and so comfortable to hold. It features a user-friendly 5.8-inch touchscreen display
and a resolution of 1440 pixels by 2960. The phone also features lots of comprehensible applications that runs smoothly; you'd expect nothing less from a mobile phone that is powered by Qualcomm SDM845 Snapdragon CPU and 4GB RAM. Here are the key specs of the Samsung Galaxy S9Release date: March 2018Operating system: Android

Samsung? I really doubt. The brand didn't only put smiles on the faces of their fans and neutrals in 2014 with the introduction of Samsung Galaxy S5, they cemented their status as one of the very best in the mobile business. The phone features a 5.1-inch touchscreen display with resolution of 1080 pixels by 1920 pixels. The mobile machine is powered
by a 2GB of RAM and boast of internal storage of 16 GB or 32GB depending on the type you are buying, which is still expandable to up to 256 GB with a dedicated microSD slot. In terms of camera quality, Samsung Galaxy s5 boasts a reliable 16-megapixel primary camera on the rear and a 2-megapixel front camera for selfies. Release date: April
2014Operating system: Android 4.4.2 KitKat, Upgradable to 6.0Display: 5.1-inchRAM: 2GBInternal memory: 16GB or 32G, expandable to 256 GB (microSD slot)Processor: Quad core 2.5 GHzNetworks: 2G ,3G & 4G (GSM, HSPA, CDMA, EVDO, & LTE)Camera: 16 MP Camera (Main), 2 MP (Selfie)Battery: 2800 mAh, removable batteryOther interesting
features: Fingerprint, accelerometer, gyro, proximity, compass, barometer, gesture, heart rate. Samsung Galaxy S4 Price in Nigeria SLOT: N/AJumia: N/AKonga: N/AEven back in 2013, Samsung Galaxy S4 showed the world the future to come
with Samsung. Samsung Galaxy S4 came with some much expectation after an exceptional S3 was released a year before. Luckily, the phone did not disappoint. With a brilliant 5.0-inch full HD display, staggering 13MP back camera and some other outstanding features, the phone with some much expectation of Samsung at the time.
Although it has lost so much value in recent times, thanks to the introduction of more sophisticated mobile phones, Samsung Galaxy S4 still maintains that respect in the mobile world today. Release date: April 2013Operating system: Android 4.2.2 Jelly Bean, Upgradable to 5.0.1 LollipopDisplay: 5.0-inchRAM: 2GBInternal memory: 16GB 32GB or
64GB, expandable to 256 GB (microSD slot)Processor: Octa-core (4×1.6 GHz)Camera: 13 MP Camera (Main), 2 MP (Selfie)Battery: 2600 mAh, removable batteryOther interesting features: Accelerometer, QI wireless charging, gyro, proximity, compass, gesture. N270, 000Konga: N180, 000 - N270, 000Every great things you have heard about Samsung and their mobile products are most likely true. When it comes to creativity, innovation, outside-the-box thinking, class and style, it is very difficult to look beyond the brand. They again proved this with the release of Samsung Galaxy Note 8 towards the end of
2017. If you desire a mobile phone that is classy, stylish, highly efficient and also features a wide screen, then you should strongly consider Samsung Galaxy Note 8. The phone not only makes it sleeker. Compared to Samsung Notes
before this, Samsung Galaxy Note 8 features a slightly smaller display screen at 6.3 inches and relatively less strong battery at 3, 300 mAh. This has not dampened its functionality in any way and has even offers enough power for users that are demanding. The phone has much in common with the Galaxy S range, with a QHD curved screen and a
dual-lens rear camera. Here are the key specs of the Samsung Galaxy Note 8Release date: September 2017Operating system: Android 8Display: 6.3 inchesRAM: 6 GBInternal memory: 64GB/128GB/256GBProcessor: Snapdragon 835 / Exynos 8895Camera: 12 MP Dual Camera (Main), 8 MP (Selfie)Battery: 3,300 mAh, non-removableOther Features: Irisatures: Irisa
